Lakeland High School

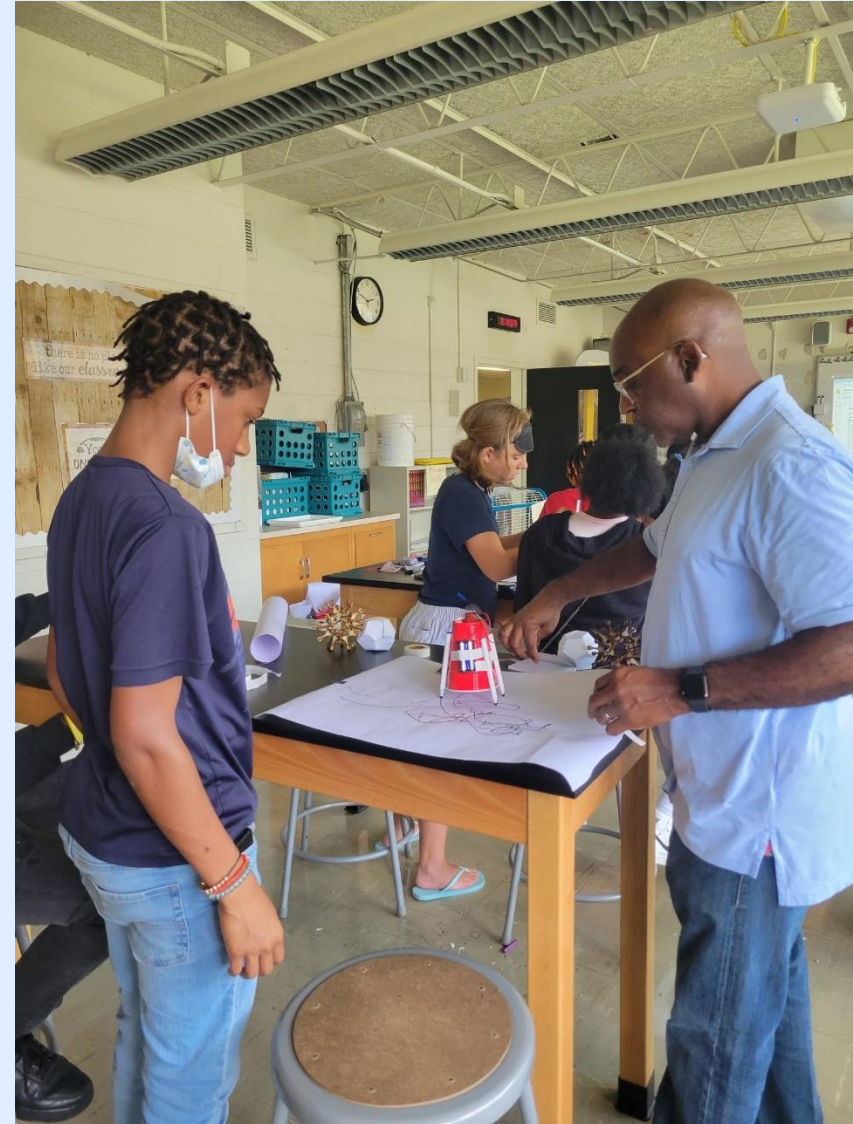

PLTW 2022-2023 Outstanding Teacher – Dawn Rountree

Dawn Rountree, Project Lead The Way/Engineering
Nansemond River High School

John F. Kennedy Middle Summer STEM Camp

- JFKMS partnered with the Naval Information Warfare Center to provide an opportunity for underrepresented students in our community.
- Mr. Shawn Frazier and his team provided the STEM activities, snacks, lunch, and swag bags for all participating students. SPS provided transportation for these students and two of our science teachers at JFK helped facilitate the activities each day.
- The Science Department is appreciative to Principal Chanel Woods for allowing this camp to partake in her building to serve her student population. This camp was a true example of a collaborative effort that provided rich opportunities to showcase career choices to our students!
- The camp was held July 18-21

Grants & Awards

- **School-Based Health Workforce Grant:** a grant opportunity for school divisions to establish, expand, train, and sustain their school health workforce. School divisions were eligible for \$80,000 of initial funding to support initiatives aligned with the recruitment, retention, and educational development of school health personnel, in addition to the opportunity to invest in activities that improve the quality of work of school health professionals by making improvements to school health systems.
